Summary

Highly accomplished and results-oriented **Quant Researcher & Developer** with 7+ years of experience designing, implementing, and deploying AI-driven trading systems within the Fintech industry. Expert in building autonomous agentic systems for risk assessment, portfolio analysis, and regulatory risk review using cutting-edge Gen-AI integration, multi-agent frameworks, and large language models. Proven capability to integrate and leverage advanced technologies (LLMs, MCP Servers, AWS, GCP Vertex, Gemini, Claude, Opus) to deliver robust, real-time solutions for quantitative teams. Skilled at dynamic Python code generation, debugging, and execution, automated HTML/CSS reporting, and end-to-end deployment of cloud-based platforms. Holds two Engineering degrees, MBAs in Finance and Corporate Law, and previously held FINRA Series 57 Securities Trader Representative license. Seeking a challenging leadership position leveraging deep expertise in AI, quant research, and trading technology within a leading financial technology firm.

Experience

Citigroup / Citibank

Quantitative Developer AI Focused
Mar 2025 – Present

- Architect and implement advanced Gen-AI frameworks enabling seamless integration of multiple MCP Servers.
- Design, develop, and deploy intelligent reasoning and acting agents using machine learning for autonomous risk assessment, portfolio analysis, and regulatory risk reviews.
- Led multiple MCP integrations and complex API workflows across financial data and trading systems.
- Developed, implemented, and supported large-scale platforms and agentic systems that operate across multiple departments, countries, companies, and portfolios, tailored for C-Level operations and decision-making.
- Program autonomous agents to interpret Quant queries, dynamically write, debug, and execute Python code in real time, and iteratively enhance solutions through

runtime analysis.

- Develop agents capable of automatically generating and refining HTML/CSS visualizations, facilitating clearer interpretation of quantitative solutions for quants.
 - Led end-to-end systems development: from ideation and initial design through programming, implementation, and deployment—including LLM model training and integration.
 - Extensive hands-on experience with SQL, AWS (S3, EC2), Google Vertex AI, Gemini, Claude, Opus, building complex AI-powered platforms and agentic systems.
 - Managed financial assets: Equity Options, Stocks, Credit, ETFs, Currencies, and Futures.
 - Collaborated with Quant Developers, Quant Analysts, Directors, Risk Analysts, Portfolio Managers, and Quant Traders, delivering transformative solutions to multi-disciplinary teams.
-

ABFS TECH

Quant Researcher & Developer (Full-Time)

March 2016 – Present

- Developed and implemented AI-driven trading systems outperforming the S&P 500 by 3X over 10 years.
 - Engineered a grid system with ROI averaging 10% monthly, Sharpe Ratio of 4.7.
 - Designed and implemented AI trading systems for hedge funds, brokerage firms, family offices, proprietary traders.
 - API integrations for Charles Schwab, TD Ameritrade, Interactive Brokers, IG, FOREX.com, Pepperstone.
 - Developed in Python, C#, C++, NinjaScript 8, MQL5, MQL4, ThinkScript, Pine Script.
 - Programmed GenAI applications—Google Gemini, Anthropic's Claude, xAI's Grok, OpenAI's ChatGPT.
 - Integrated financial platforms, built smartphone applications, connected systems within financial markets.
 - Extensive expertise with AWS cloud computing solutions.
 - Worked closely with Portfolio Managers, Front Office, Middle Office, Back Office, and teams from multiple Hedge Funds, Family Offices, Banks, and other financial institutions.
-

T3 Trading Group

Quant Researcher & Developer (Part-Time)

Feb 2019 – Dec 2019

- Developed algorithmic trading solutions for Stocks, Equity Options, ETFs using machine learning/statistics.
 - Built, backtested, optimized trading algorithms and financial performance tests in Python, SQL, C#, C++.
 - Led API integrations for real-time trading and data workflows.
 - Partnered with Portfolio Managers, Traders, Developers to deliver production strategies.
-

Brinpa Investments and Participations

Investments Director (Part-Time)

Jan 2006 – Jun 2015

- Managed early-stage investments, following up through final payout.
 - Responsible for performance analysis and investment project selection.
-

▮ Skills

Programming Languages:

Python, C#, C++, SQL, HTML, CSS, JavaScript, MQL5, MQL4, NinjaScript 8, ThinkScript, Pine Script

Software & Tools:

Amazon Web Services (AWS), Google Gemini, Anthropic's Claude, Opus, Sonnet, OpenAI's ChatGPT, Metatrader, Charles Schwab Trading Platform, TradingView, Alveo C# Platform, Unity

Quantitative Analysis:

Algorithmic Trading, Quantitative Research, Mathematical Modeling, Statistical Analysis, Risk Management, Portfolio Optimization, Backtesting, Derivatives Pricing, Monte Carlo Simulation, Time Series Analysis, Financial Algorithms, Options & Futures, ETFs & Indexes, Pearson Correlation Analysis

Artificial Intelligence (AI):

Machine Learning, AI Trading Systems, Predictive Modeling, Neural Networks, Model Optimization, Deep Learning, Natural Language Processing, Large Language Models (LLM), Generative AI (GenAI), Agentic AI, LangGraph

Financial Expertise:

Financial Engineering, Quantitative Finance, Financial Modeling, Cryptocurrency Trading, Forex Trading, Equities, CFDs, Portfolio Management, Financial Analysis, Equity Options, Stocks, Futures, Futures Options, Credit Instruments, Currencies

Other Skills:

API Integration, Mobile App Development, Project Management, Client Communication, Strong Analytical & Research Skills, Problem-solving, Excellent Written & Verbal Communication, Low Latency Development, Docker

▮ Education

- **Harvard University**

Certification, Artificial Intelligence in Python
August 2023 – January 2024

- **Federal Fluminense University**

1st Engineering Degree
Diploma, 2002

- **UNESA**

2nd Engineering Degree
Diploma, 2014

- **Ibmec**

*Attended 50 credits towards MBA, Finance
2005–2006*

- **FGV – Getulio Vargas Foundation**

*Attended 36 credits towards MBA, Corporate Law
2003–2004*

▮ Certifications & Licenses

Certification / License	Issuing Organization
Harvard University Certification, Artificial Intelligence in Python	Harvard University
Prompt Engineering for ChatGPT	Vanderbilt University
API Serverless Gateway Certification (AWS)	Amazon Web Services (AWS)
AWS Cloud Computing Certification (AWS)	Amazon Web Services (AWS)
Artificial Intelligence Certification	Google Launchpad
Blockchain Certification	Google Launchpad
Cybersecurity Certification	Google Launchpad
Data Science Certification	Google Launchpad
Decoupled Applications Certification	Amazon Web Services (AWS)
Deploying & Scaling Applications with Amazon Lightsail Certificate	Amazon Web Services (AWS)
Docker Certification Course	Google Launchpad
Firebase Certification	Google Launchpad
GIT Certification	Google Launchpad
HoneyCode Certification	Google Launchpad
Lambda Foundations Certification	Amazon Web Services (AWS)
Licensed Engineer	Crea-RJ
Machine Learning Certification	Google Launchpad
MySQL Certificate	Amazon Web Services (AWS)
Node.js Certification	Google Launchpad

PHP Programming Certification	Sololearn
Programming in C# Certification	Google Launchpad
Python 3 Certificate	Google Launchpad
Python Advanced Certification	Google Launchpad
SQL Programming Certification	Google Launchpad
Series 57 - Securities Trader Representative Exam License (previously held)	FINRA
Social Media Marketing Certification Course	Google Launchpad
Solidity Programming for Ethereum Blockchain Certification	Google Launchpad
Unity Programming Certificate	Google Launchpad
Website Building Certification Course	Google Launchpad
WooCommerce Themes Certification	[Issuing Organization]

▮ Publications

- **Cryptocurrency – Starter's Guide for Traders and Investors**

ISBN: 978-1-63901-260-2

Publisher: Primedia

Publication Date: May 2021
